Re-Add missing SSID's to local computer Administrator group

Dave Topan - 2024-02-04 - 0 Comments - in Office 365

To re-add accidentally removed Microsoft 365 GA/Local admin groups to local Administrators:

```
add-localgroupmember -group "Administrators" -Member  
"S-1-12-1-9004393-1283818314-846049430-1489853906"
```

```
add-localgroupmember -group "Administrators" -Member  
"S-1-12-1-1307019558-1095313948-1185333899-1455320757"
```
